

Century Water Barrier

Manufactured from durable polyethylene material and available in various gauges and depths. The Water Barriers are available in pre-cut rolls or custom made to order roll sizes.

Caution: Water Barrier will not turn tree roots downward for subsequent lateral growth. If Water Barrier is to be used near a tree please consult Century Products at: (714) 632-7083 or a local arborist.

Typical Applications:

- Golf green liners
- Irrigated median plantings
- Drainage
- New foundation protection

Using the **Century Water Barrier** as a Bamboo Barrier is a very effective way to delay the growth and spread of invasive Bamboo species. The flat smooth surface of the barrier acts as a wall or root stop, which directs the rhizome downward and prevents rampant growth. Since the rhizome cannot penetrate the barrier it will be directed to grow downward along the surface of the barrier. This action will prevent unwanted spread and growth while containing the Bamboo species.

Features:

- Available in various sizes; 100 lb. rolls or cut to size
- Durable High Density Polyethylene material
- Made from recycled plastic
- Easy overlap connection
